

Veeam Backup & Replication

#1 VM Backup for VMware vSphere and Microsoft Hyper-V

“If you want worry-free Availability, choose Veeam. Of all the solutions available, Veeam is the Ferrari sitting on the showroom floor.”

John Burks,
 Director of Information
 Technology,
 BLR

“You’ve got to let Veeam do what it does best — back up and restore data in a rapid fashion.”

Ryan McClain,
 Systems Architect,
 U.S. Legal Support, Inc.

“We had two options: we could spend more than half the work week managing and worrying about VM backup and replication, or we could put Veeam in place and forget about it.”

Brooks Barnes,
 Systems Administrator,
 Great Southern Wood
 Preserving, Inc.

“We have confidence in Veeam; we trust Veeam. Trust is something you don’t play around with.”

Josef Kormann,
 Head of IT Operations,
 Christof Holding AG

“Veeam Backup & Replication is way past WOW! This is what the backup world needs. Veeam has already given me hours of my life back each week.”

Larry Walker,
 Vice President and
 Data Processing Officer,
 Chelsea Groton Bank

Veeam® Backup & Replication™ provides fast, flexible, and reliable recovery of virtualized applications and data. We bring backup and replication together in a single solution with award-winning support for VMware vSphere and Microsoft Hyper-V virtual environments.

This powerful, easy-to-use and affordable backup and Availability solution leverages virtualization, storage and cloud technologies to meet SLAs for recovery time and point objectives (RTPO™) of <15 minutes for ALL applications and data.

#1 VM Backup™ features Backup

Veeam provides fast and reliable backup for vSphere and Hyper-V virtual environments — all without the use of agents.

- **Image-level VM backups:** Create application-consistent backups with advanced application-aware processing.
- **Backup from Storage Snapshots for HPE, NetApp, EMC and Nimble^{NEW}:** Generate ultra-fast backups with low RPOs.
- **Scale-out Backup Repository™:** Create a single virtual pool of backup storage to which backups can be assigned, offering the freedom to easily extend backup storage capacity.
- **Veeam Cloud Connect:** Get backups off site without the cost and complexity of building and maintaining an off-site infrastructure; fast and secure cloud backup to a service provider.
- **SureBackup®:** Automatically test and verify every backup and every virtual machine (VM) for recoverability.
- **Built-in WAN acceleration:** Get backups off site up to 50x faster and save bandwidth.
- **Direct Storage Access:** Perform vSphere backups faster and with reduced impact by backing up via Direct SAN Access and Direct NFS Access.

Recovery

Veeam delivers lightning-fast, reliable restore for individual files, entire VMs and application items — ensuring you have confidence in virtually every recovery scenario.

- **Instant VM Recovery®:** Recover a failed VM in less than two minutes.
- **Instant File-Level Recovery:** Recover guest OS files and folders on the fly.
- **ENHANCED Veeam Explorer™ for Microsoft Active Directory:** Instantly recover individual AD objects and entire containers, easily recover user accounts and passwords, enable restores of Group Policy Objects (GPOs), Active Directory-integrated DNS records and more.
- **ENHANCED Veeam Explorer for Microsoft Exchange:** Instant visibility and granular recovery of individual Exchange items, including hard-deleted items, detailed export reports for eDiscovery and more.

Supported Environments

VMware infrastructure

Platforms

- vSphere 6.0
- vSphere 5.x
- vSphere 4.1

Hosts

- ESXi 6.0
- ESXi 5.x
- ESX(i) 4.1

Software

- vCenter Server 6.0 (optional)
- vCenter Server 5.x (optional)
- vCenter Server 4.1 (optional)
- vCloud Director 5.5, 8.0 (optional)

Virtual Machines

- All OSs supported by VMware
- Any application
- Any file system

Microsoft infrastructure

Platforms

- Windows Server 2016
- Windows Server 2012 R2
- Windows Server 2012
- Windows Server 2008 R2 SP1

Hosts

- Windows Server Hyper-V 2016
- Windows Server Hyper-V 2012 R2
- Windows Server Hyper-V 2012
- Windows Server Hyper-V 2008 R2 SP1
- Microsoft Hyper-V Server (free hypervisor)

Software

- Microsoft System Center Virtual Machine Manager 2012 R2 (optional)
- Microsoft System Center Virtual Machine Manager 2012 SP1 (optional)
- Microsoft System Center Virtual Machine Manager 2008 R2 SP1 (optional)

Virtual Machines

- All OSs supported by Microsoft Hyper-V
- Any application
- Any file system

Editions Veeam Backup & Replication comes in three editions — Standard, Enterprise and Enterprise *Plus* — so you can choose the one that best meets your needs and budget.

- **ENHANCED Veeam Explorer for Microsoft SharePoint:** Instant visibility into SharePoint backups; easily find and recover specific SharePoint items as well as individual sites.
- **ENHANCED Veeam Explorer for Microsoft SQL Server:** Fast transaction and table-level recovery of SQL databases allowing for precise point-in-time restore.
- **ENHANCED Veeam Explorer for Oracle:** Transaction-level recovery of Oracle databases, including agentless transaction log backups, enabling precise point-in-time restore.
- **ENHANCED Veeam Explorer for Storage Snapshots:** Recover single files and entire VMs from HPE, NetApp, EMC and Nimble^{NEW} storage snapshots.
- **ENHANCED Native tape support:** Store entire VM backups or individual files on tape including features like direct restore from tape^{NEW} for growing enterprise environments.

Replication

Veeam provides advanced, image-based VM replication and streamlined disaster recovery — ensuring the Availability of your mission-critical applications.

- **Image-based VM replication:** Replicate VMs onsite for high-Availability or offsite for disaster recovery.
- **Veeam Cloud Connect Replication:** Get replicas off site without the cost and complexity of building and maintaining a disaster recovery site; fast and secure cloud-based disaster recovery (DRaaS) through a service provider.
- **SureReplica:** Automatically test and verify every VM replica for recoverability.
- **Built-in WAN acceleration:** Get replicas off site up to 50x faster and save bandwidth.
- **Failover and Failback:** Replica rollback and assisted failover and failback with little to no business interruption.
